MOTORS

YOUR OBSESSION

HAS MET ITS ENABLER.

TOUR PRO

Tour Pro has the most accurate GPS Anchor and unmatched durability with a 360° breakaway mount and a no-flex metal foot pedal. Tour Pro provides quiet, effortless stowing and deploying with a zero-G lift assist system and HD+ Universal Sonar Compatibility.

941900020 ⚠

Xi3

Wireless control and optional GPS capabilities are ready right out of the box. Innovative SecureStep stowing and deploying means you can save your energy for fighting fish, rather than fighting your trolling motor.

940700170 ⚠

Xi5

Features quiet, responsive electric steering and 50% faster steering rotation than competitors, standard Pinpoint® GPS for GPS-assisted Anchor, Jog, Cruise Control and more.

ACCESSORIES

NEW KATANA

Hub size: 3.5"

Our new Katana two-blade weedless prop combines NASA's hydrofoil design and Mercury Outboard Propeller's industry-leading technology for the most powerful and efficient trolling motor prop on the market. Katana props deliver more power and up to 30% more battery efficiency compared to previous props and excel in current, shallow- and open-water applications.

10.25" diameter, constructed of black, glass-filled nylon. Standard on Tour Pro and Tour, or easily repower any existing MotorGuide trolling motor with a 3.5" hub. Prop kit includes prop pin, nut and washer.
